C Programming Questions

- Write a C program to calculate even or odd numbers.
- Write a C program to calculate factorial of a number.
- Write a C program to calculate Fibonacci series up to n terms.
- Write a C program to calculate prime numbers in a range.
- Write a C program to calculate GCD of two numbers.
- Write a C program to calculate LCM of two numbers.
- Write a C program to calculate reverse a number.
- Write a C program to calculate sum of digits of a number.
- Write a C program to calculate swap two numbers.
- Write a C program to calculate largest and smallest element in an array.
- Write a C program to calculate bubble sort an array.
- Write a C program to calculate selection sort an array.
- Write a C program to calculate insertion sort an array.
- Write a C program to calculate binary search in a sorted array.
- Write a C program to calculate vowel and consonant count in a string.
- Write a C program to calculate palindrome string check.
- Write a C program to calculate reverse a string.
- Write a C program to calculate concatenate two strings.
- Write a C program to calculate compare two strings.
- Write a C program to calculate length of a string without library functions.
- Write a C program to calculate copy a string without library functions.
- Write a C program to calculate merge two sorted arrays.
- Write a C program to calculate implement stack using array.
- Write a C program to calculate implement queue using array.
- Write a C program to calculate evaluate postfix expression.
- Write a C program to calculate convert infix to postfix.

CodeNeuraX

CodeNeuraX

- Write a C program to calculate check balanced parentheses.
- Write a C program to calculate implement a linked list.
- Write a C program to calculate insert a node in linked list.
- Write a C program to calculate delete a node from linked list.
- Write a C program to calculate reverse a linked list.
- Write a C program to calculate length of a linked list.
- Write a C program to calculate detect loop in linked list.
- Write a C program to calculate implement a binary search tree.
- Write a C program to calculate inorder traversal of BST.
- Write a C program to calculate preorder traversal of BST.
- Write a C program to calculate postorder traversal of BST.
- Write a C program to calculate tower of Hanoi solution.
- Write a C program to calculate merge sort algorithm.
- Write a C program to calculate quick sort algorithm.
- Write a C program to calculate read and sum numbers from a file.
- Write a C program to calculate write numbers to a file.
- Write a C program to calculate handle command line arguments.
- Write a C program to calculate matrix multiplication.
- Write a C program to calculate transpose of a matrix.
- Write a C program to calculate sparse matrix representation.
- Write a C program to calculate string to integer conversion.
- Write a C program to calculate integer to string conversion.
- Write a C program to find even or odd numbers.
- Write a C program to find factorial of a number.
- Write a C program to find Fibonacci series up to n terms.
- Write a C program to find prime numbers in a range.
- Write a C program to find GCD of two numbers.
- Write a C program to find LCM of two numbers.
- Write a C program to find reverse a number.
- Write a C program to find sum of digits of a number.
- Write a C program to find swap two numbers.

CodeNeuraX

CodeNeuraX

- Write a C program to find largest and smallest element in an array.
- Write a C program to find bubble sort an array.
- Write a C program to find selection sort an array.
- Write a C program to find insertion sort an array.
- Write a C program to find binary search in a sorted array.
- Write a C program to find vowel and consonant count in a string.
- Write a C program to find palindrome string check.
- Write a C program to find reverse a string.
- Write a C program to find concatenate two strings.
- Write a C program to find compare two strings.
- Write a C program to find length of a string without library functions.
- Write a C program to find copy a string without library functions.
- Write a C program to find merge two sorted arrays.
- Write a C program to find implement stack using array.
- Write a C program to find implement queue using array.
- Write a C program to find evaluate postfix expression.
- Write a C program to find convert infix to postfix.
- Write a C program to find check balanced parentheses.
- Write a C program to find implement a linked list.
- Write a C program to find insert a node in linked list.
- Write a C program to find delete a node from linked list.
- Write a C program to find reverse a linked list.
- Write a C program to find length of a linked list.
- Write a C program to find detect loop in linked list.
- Write a C program to find implement a binary search tree.
- Write a C program to find inorder traversal of BST.
- Write a C program to find preorder traversal of BST.
- Write a C program to find postorder traversal of BST.
- Write a C program to find tower of Hanoi solution.
- Write a C program to find merge sort algorithm.
- Write a C program to find quick sort algorithm.
