Python Programming Questions

Easy

- Wrote a Python program to calculate even or odd numbers.
- Wrote a Python program to calculate factorial of a number.
- Wrote a Python program to calculate Fibonacci series up to n terms.
- Wrote a Python program to calculate prime numbers in a range.
- Wrote a Python program to calculate GCD of two numbers.
- Wrote a Python program to calculate LCM of two numbers.
- Wrote a Python program to calculate reverse a number.
- Wrote a Python program to calculate sum of digits of a number.
- Wrote a Python program to calculate swap two numbers.
- Wrote a Python program to calculate largest and smallest element in an array.
- Wrote a Python program to calculate bubble sort an array.
- Wrote a Python program to calculate selection sort an array.
- Wrote a Python program to calculate insertion sort an array.
- Wrote a Python program to calculate binary search in a sorted array.
- Wrote a Python program to calculate vowel and consonant count in a string.
- Wrote a Python program to calculate palindrome string check.
- Wrote a Python program to calculate reverse a string.
- Wrote a Python program to calculate concatenate two strings.
- Wrote a Python program to calculate compare two strings.
- Wrote a Python program to calculate length of a string without library functions.
- Wrote a Python program to calculate copy a string without library functions.
- Wrote a Python program to calculate merge two sorted arrays.
- Wrote a Python program to calculate implement stack using array.
- Wrote a Python program to calculate implement queue using array.
- Wrote a Python program to calculate evaluate postfix expression.

CodeNeuraX

CodeNeuraX

- Wrote a Python program to calculate convert infix to postfix.
- Wrote a Python program to calculate check balanced parentheses.
- Wrote a Python program to calculate implement a linked list.
- Wrote a Python program to calculate insert a node in linked list.
- Wrote a Python program to calculate delete a node from linked list.
- Wrote a Python program to calculate reverse a linked list.
- Wrote a Python program to calculate length of a linked list.
- Wrote a Python program to calculate detect loop in linked list.
- Wrote a Python program to calculate implement a binary search tree.
- Wrote a Python program to calculate inorder traversal of BST.
- Wrote a Python program to calculate preorder traversal of BST.
- Wrote a Python program to calculate postorder traversal of BST.
- Wrote a Python program to calculate tower of Hanoi solution.
- Wrote a Python program to calculate merge sort algorithm.
- Wrote a Python program to calculate quick sort algorithm.
- Wrote a Python program to calculate read and sum numbers from a file.
- Wrote a Python program to calculate write numbers to a file.
- Wrote a Python program to calculate handle command line arguments.
- Wrote a Python program to calculate matrix multiplication.
- Wrote a Python program to calculate transpose of a matrix.
- Wrote a Python program to calculate sparse matrix representation.
- Wrote a Python program to calculate string to integer conversion.
- Wrote a Python program to calculate integer to string conversion.
- Wrote a Python program to find even or odd numbers.
- Wrote a Python program to find factorial of a number.
- Wrote a Python program to find Fibonacci series up to n terms.
- Wrote a Python program to find prime numbers in a range.
- Wrote a Python program to find GCD of two numbers.
- Wrote a Python program to find LCM of two numbers.
- Wrote a Python program to find reverse a number.
- Wrote a Python program to find sum of digits of a number.
- Wrote a Python program to find swap two numbers.

CodeNeuraX

CodeNeuraX

- Wrote a Python program to find largest and smallest element in an array.
- Wrote a Python program to find bubble sort an array.
- Wrote a Python program to find selection sort an array.
- Wrote a Python program to find insertion sort an array.
- Wrote a Python program to find binary search in a sorted array.
- Wrote a Python program to find vowel and consonant count in a string.
- Wrote a Python program to find palindrome string check.
- Wrote a Python program to find reverse a string.
- Wrote a Python program to find concatenate two strings.
- Wrote a Python program to find compare two strings.
- Wrote a Python program to find length of a string without library functions.
- Wrote a Python program to find copy a string without library functions.
- Wrote a Python program to find merge two sorted arrays.
- Wrote a Python program to find implement stack using array.
- Wrote a Python program to find implement queue using array.
- Wrote a Python program to find evaluate postfix expression.
- Wrote a Python program to find convert infix to postfix.
- Wrote a Python program to find check balanced parentheses.
- Wrote a Python program to find implement a linked list.
- Wrote a Python program to find insert a node in linked list.
- Wrote a Python program to find delete a node from linked list.
- Wrote a Python program to find reverse a linked list.
- Wrote a Python program to find length of a linked list.
- Wrote a Python program to find detect loop in linked list.
- Wrote a Python program to find implement a binary search tree.
- Wrote a Python program to find inorder traversal of BST.
- Wrote a Python program to find preorder traversal of BST.
- Wrote a Python program to find postorder traversal of BST.
- Wrote a Python program to find tower of Hanoi solution.
- Wrote a Python program to find merge sort algorithm.
- Wrote a Python program to find quick sort algorithm.
